

Online Resource 3 . Haplotype frequency of examined ZNF750 variants

rs8074277	rs12450046	rs11077947	p-value	OR	CI 95%
T	G	A	-	-	-
T	G	G	0.227	1.148	0.927 - 1.42
C	A	G	0.829	1.068	0.859 - 1.33

Haplotypes not frequent enough to allow haplotype analysis were excluded from the table.
The reference haplotype corresponds to the most frequent one (TGA).

Common variants of ZNF750, RAPTOR and TRAF3IP2 genes and psoriasis risk.
