

Supplemental Figure 1. UV-absorption spectra of methanolic and water extracts produced by the halotolerant cyanobacterium *Aphanothecace halophytica*. (A) Methanolic phase. (B) Water phase. *A. halophytica* cells were grown in BG11+AT+0.5 M NaCl for 14 days before extraction.

Supplemental Table 1. Primers for isolation and expression of *Ap-MAA* gene

Primers	5' – 3'	Base pair
Ap3858bam	5' -GGATCCAAGTCTAGCTGTATCTCTAC-3'	26 mer
