

Supplementary Figure 4

Supplementary Figure 4: Expression of T cell activation markers on CD4⁺ T_{SCM} cells. (a): Representative flow cytometry dot plots reflecting expression of HLA-DR and CD38 on indicated CD4⁺ T cell subsets. Quadrant cut-offs were set according to fluorescence-minus-one (FMO) controls. (b): Proportions of cells co-expressing HLA-DR and CD38 in each of the indicated CD4⁺ T cell subsets. Cumulative data from n=10 study subjects are shown. Significance was tested using Wilcoxon rank sum tests followed by Bonferroni correction for multiple comparisons (*, ** reflect p<0.05, p<0.01 respectively).
