

**EFEMP1 induces  $\gamma$ -secretase/Notch-mediated temozolomide resistance in glioblastoma – Hiddingh et al**

**Supplementary Figure S1:** Correlation of TMZ IC<sub>50</sub> values and EFEMP1 mRNA expression levels. IC<sub>50</sub> values of the WT, R1, and R2 glioblastoma cell lines were compared to the corresponding EFEMP1 expression levels ( $r^2=0.56$   $p=0.021$ ).
