

Supplementary Figure 1

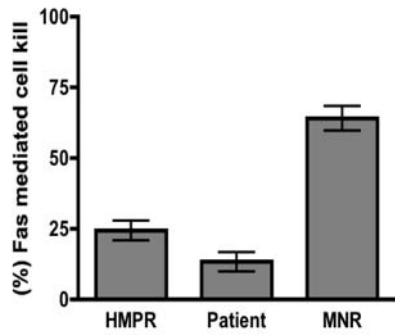

Figure Legend: Supplementary Figure 1. FAS-mediated apoptosis assays. Cell kill (K) as a percentage of FAS-stimulated (S) to unstimulated (U) peripheral blood lymphocytes from 18 ALPS-FAS patients, 30 HMPRs and 15 MNRs used as controls according to the equation $K = 1 - S/U \times 100\%$. The bars show average \pm standard deviation.
