

Figure S3. Protective efficacy of antibody raised to the synthetic oligosaccharide-conjugate vaccine (9GlcNH₂)-Stx1b against EDL933. Infant mice were given 80 μ l of the indicated antisera 24 and 4 h prior to challenge with $\sim 8-9 \times 10^8$ EDL933 CFU/mouse. P values generated by log-rank analysis of the survival curves.
