

Figure S5. Enrichment analysis of six histone modifications across ZBED6 target sites. ZBED6 target genes were divided into up-regulated and down-regulated genes after Zbed6 silencing. The asterisk indicates a significant difference ($P < 0.05$). H3K4me2 (dark red), H3K4me3 (green), H3K27ac (purple), H3K4me1 (blue), H3K27me3 (pink), and H3K36me3 (yellow).
