

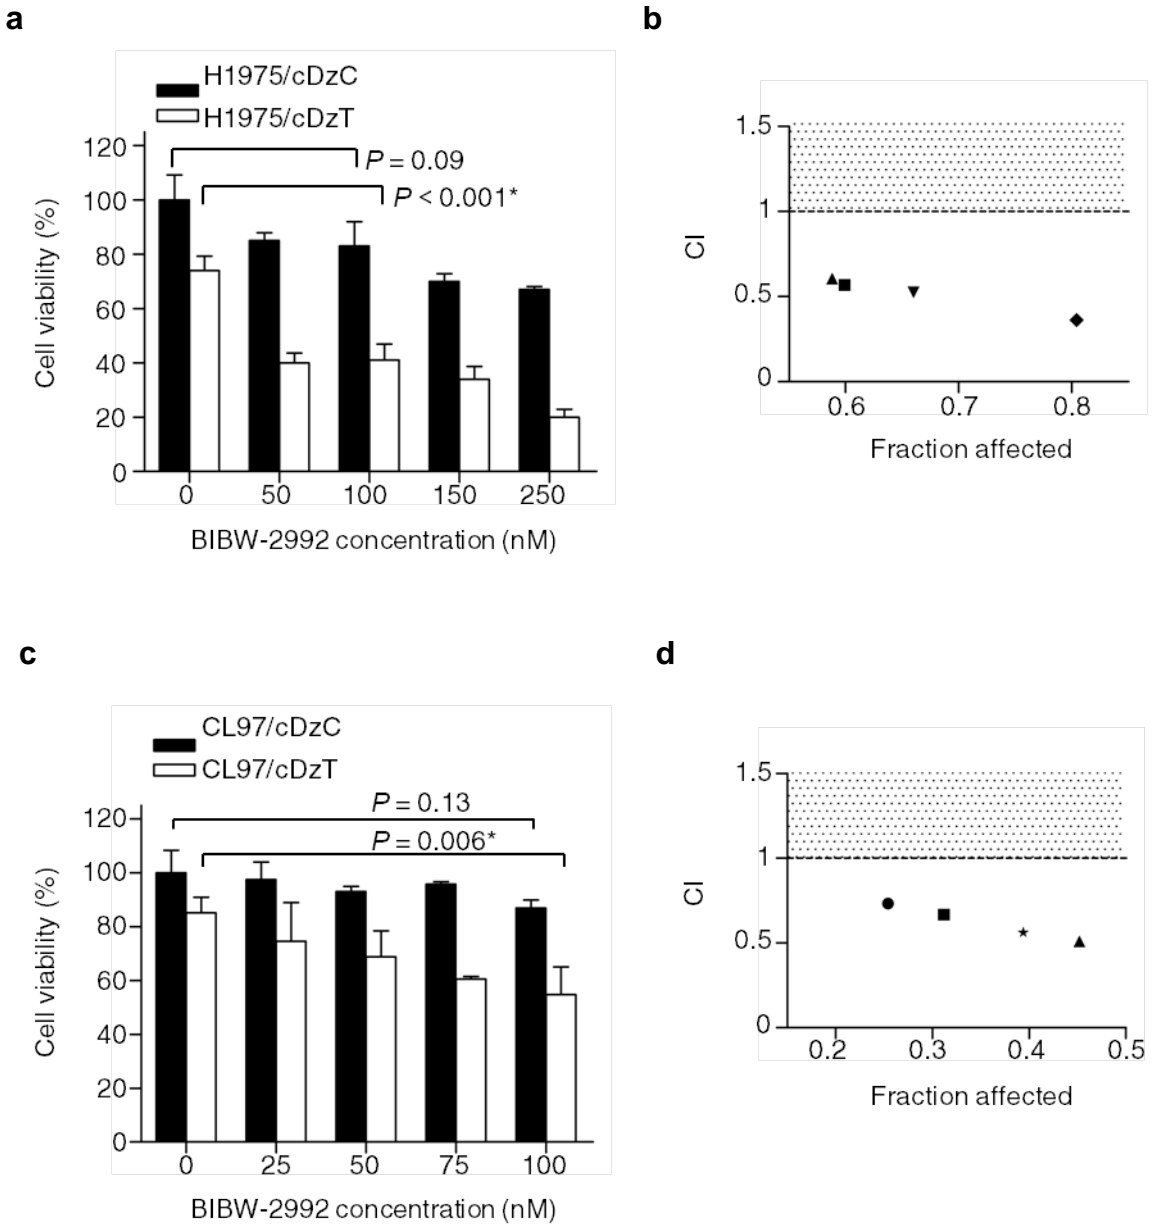

Figure S7

Figure S7. Combined treatment of cDzT and BIBW-2992 exerts a synergistic inhibitory effect on cell viability in cells harboring EGFR T790M mutants. MTT assay of H1975^{TM/LR} cells (**a, b**) or CL97^{TM/GA} cells (**c, d**) treated with cDzC or cDzT (25 nM) combined with 25 nM (●), 50 nM (■), 75 nM (★), 100 nM (▲), 150 nM (▼), or 250 nM (◆) BIBW-2992 ($n = 3$). The data are presented as the means \pm SD. The results were analyzed by Student's *t*-test and CI calculation. An asterisk denotes statistical significant difference.
