

Figure S3

Figure S3. Bleed-through of fluorescence emission into other fluorescence channels.

Fluorescence images in CFP/CFP, FRET (CFP/YFP) and YFP/YFP channels of HEK293 cells that were transfected with CFP only expressing construct (top row) or YFP only expressing construct (bottom row). TLR9 associated with SERCA2 in Unc93b1 knocked down RAW264.7 cells, but not in control RAW264.7 cells.
