

Fig. S1

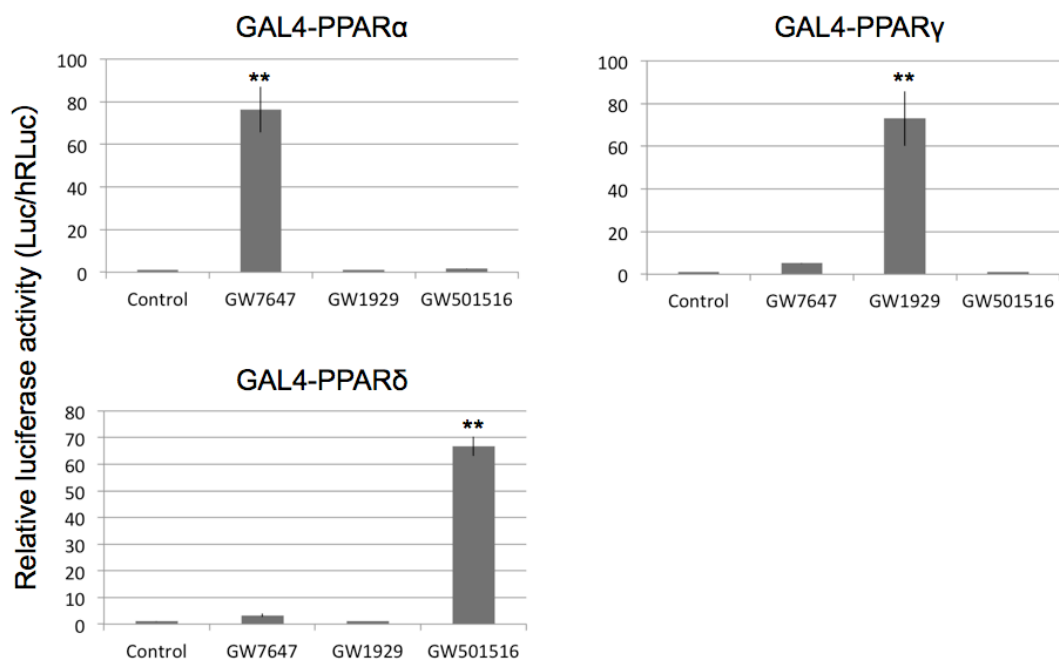

Fig. S1. GAL4-PPARs assays of PPAR agonists. GW7647 is a PPAR α agonist, GW1929 is a PPAR γ agonist, and GW501516 is a PPAR δ agonist. NIH-3T3 cells were transfected with reporter plasmids and cultured with 1 μ M PPAR agonists for 24 hours. Then firefly luciferase (Luc) activities were measured, and the values were normalized against Renilla luciferase (hRLuc) activity. Plotted values represent the mean \pm SD from four independent cultures. Significant differences from the control are indicated by **: $p < 0.01$.
