

Hussong_Fig.S1

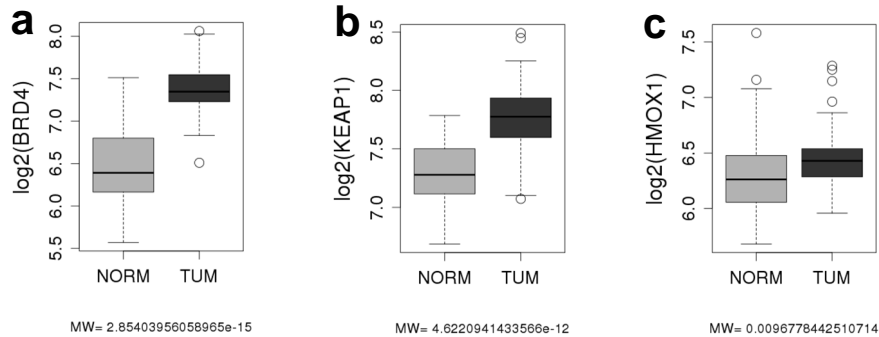

Figure S1. Gene expression of BRD4, KEAP1 and HMOX1 in prostate tumor and normal samples. Shown are box plots of the expression of **(a)** BRD4 (Mann-Whitney p-value: $p < 2.9 \times 10^{-15}$), **(b)** KEAP1 (Mann-Whitney p-value: $p < 4.7 \times 10^{-12}$) and **(c)** HMOX1 (Mann-Whitney p-value: $p < 0.01$). Differential expressions were calculated based on values of 47 tumor and 48 normal samples.
