

Supplementary Figure 2. IL-10 production by CD4⁺ T cells during influenza requires IL-27. *Il-27ra*^{-/-}, or wild-type (WT) C57BL/6 mice were infected with 2500 EID influenza virus. Numbers of **(A)** IL-10⁺IFN- γ ⁺CD4⁺ or **(C)** single IL-10⁺CD4⁺ T cells in the BAL and lungs of *Il-27ra*^{-/-} mice were analyzed by FACS after *in vitro* restimulation with PMA/iono. **(B)** Ratios of IL-10:IFN- γ in gated CD4⁺ T cells from infected *Il-27ra*^{-/-} mice. All data sets were analyzed at 9 d.p.i and are pooled from two independent experiments. *P* values were determined by unpaired two-tailed Student's *t* test. Values are means \pm s.d.; ns, not significant.
