

Supplementary Figure 3. Induction of IL-10 in CD4⁺ T cells partially requires STAT4 but not IL-12. (A) *Stat4*^{-/-}, (B) *Il-12p40*^{-/-} or WT mice were infected with influenza virus. Lungs were analyzed for IL-10⁺IFN- γ ⁺CD4⁺ T cells by FACS and (C) viral polymerase (*pa*) mRNA expression by qRT-PCR. FACS plots represent data from two independent experiments with similar results. All data sets were analyzed at 9 d.p.i and are pooled from two independent experiments. *P* values were determined by unpaired two-tailed Student's *t* test. Values are means \pm s.d.; ns, not significant.
