

Standard curve for the *CecA* gene by qPCR analysis of serial DNA dilution.

Copies of <i>CecA</i> gene	Ct values	SD
100000	20.65	0.04
10000	23.83	0.04
1000	27.42	0.15
100	30.75	0.21
10	34.73	0.21

Estimated *CecA* gene copy number in the transgenic lines by qPCR analysis. The value used for calculation was 0.86-0.91 pg of DNA for the rice diploid genome (http://archive.gramene.org/newsletters/rice_genetics/rgn10/vXV32.htm)

Transgene	Event	Ct Value	SD	Copy number 30 ng gDNA	Copy number per genome
None	WT-1	31.69	0.03	62.59	0.00
None	EV-1	31.07	0.22	94.04	0.01
None	EV-2	31.95	0.25	52.89	0.00
