

Supplementary information, Figure 7. In vitro binding assay of GR Q642A mutant protein. (A), in vitro ligand binding experiment using cytosol from AD293 cells that expressed either wild type GR or Q642A mutant GR. CPM: counts per minute. Error bars=SD, n=2. (B), DEX dose response curve of WT GR and Q642A GR in a MMTV-Luc reporter assay. Error bars=SD, n=3. (C), GR Q642A ligand competition assay. Error bars=SD, n=2.
