

SUPPLEMENTARY FIG. S3. Hair growth promotion effects of HGF in hair organ culture. **(A)** HGF treatment (1 and 10 ng/mL) increased hair length in hair organ culture. **(B)** In addition, the number of Ki₆₇-positive matrix keratinocytes around the dermal papilla was significantly increased by HGF treatment. Data are mean ± STD (**P* < 0.05, ***P* < 0.01, Student's *t*-test).
