

Supplementary Data

SUPPLEMENTARY FIG. S1. Effect of *murT-gatD* conditional expression on beta-lactam resistance phenotype in COL and MW2 strains. Oxacillin inhibition halos (1-mg disks) were determined for COL, COLp*CadmurT-gatD*, (A) MW2, and MW2p*CadmurT-gatD* (B) own under CdCl₂ concentrations of 0 and 0.2 μM.
