

Table S4

	<u>FGFR1</u>	<u>FGFR2</u>	<u>FGFR3</u>	<u>FGFR4</u>
<b>Fold Regulation (+/- SE) n=20</b>	7.96(+/- 2.87)	8.06(+/- 2.86)	6.77(+/- 3.20)	7.75(+/- 3.10)

**Supplemental Table 2.** FGFR expression is increased in BC tumors as compared to matched normal tissues. Twenty BC tumor biopsies were analyzed by RT-PCR for expression of FGFRs 1-4 whose expression levels were normalized against RNA gathered from adjacent normal tissues. Data shown are the mean-fold increases (+SE) in FGFR levels as compared to the matched normal tissue.
