

## **Supplementary Materials**

**Table S1.** The siRNAs used in this study.

**Table S2.** The primers used in this study for real-time RT-PCR.

**Figure S1. Knockdown efficiency of siRNAs against RIG-I, Toll-like receptors, NLRP3 and ASC.**

(A-L) PAMs were transfected with 80 nM of psiRIG-I, psiTLR1-9, psiNLRP3 and psiASC, respectively. Cells transfected with psiNegative were used as controls. The transfected cells were collected at 24 h post-transfection to examine the endogenous transcription of porcine RIG-I, TLR1-9, NLRP3 and ASC mRNA by real-time RT-PCR. The expression level of RIG-I, TLR1-9, NLRP3 and ASC were first normalized to that of  $\beta$ -actin in the same sample and then compared with that of cells transfected with psiNegative. The presented data indicates the mRNA expression level of the tested molecules in cells transfected with specific siRNA relative to that in psiNegative-transfected cells. \*\*P < 0.01 compared with cells transfected with psiNegative.

**Table S1. The siRNAs used in this study.**

Gene name	Sequence region	siRNA sequence (Sense)	siRNA sequence (Anti-sense)
RIG-I	650-670	5'-GGU ACA AAG UUG CAG GCA UTT -3'	5'-AUG CCU GCA ACU UUG UAC CTT-3'
TLR1	1160-1180	5'-CCC ACA AAG UUA CAU CUA UTT-3'	5'-AUA GAU GUA ACU UUG UGG GTT-3'
TLR2	1247-1267	5'-GCC CUU CCU ACA CAC UUU ATT-3'	5'-UAA AGU GUG UAG GAA GGG CTT-3'
