

Figure S5 Developmental expression patterns of NADK family genes in Arabidopsis and rice.

Expression profiles obtained from (A) Arabidopsis and (B) rice microarray data in BAR (Bio-Analytic Resource, <http://bar.utoronto.ca/welcome.htm>), respectively. Results are shown as bar charts that reflect the absolutely expressive abundance of each NADK genes in different tissues. The *AtNADK3* was not available in BAR and its tissue expression patterns were not involved.
