Figure S1

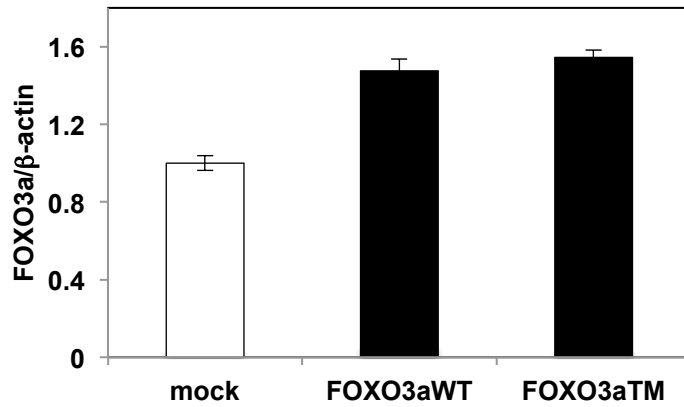

Fig. S1. FOXO3a expression level in recombinant HUC-F2 cells. The FOXO3a expression in HUC-F2 cells transduced with FOXO3aWT, FOXO3aTM or mock were assessed by qPCR in triplicate using primers specific for FOXO3a (5'-TTGAAGCGGATGCCCAAATAA-3' and 5'-ACGTATTTCTGGAGTGTGGCAAGAG-3') and for β -actin, and normalized to the corresponding β -actin level.
