

Supplemental Data

Fig. S3.

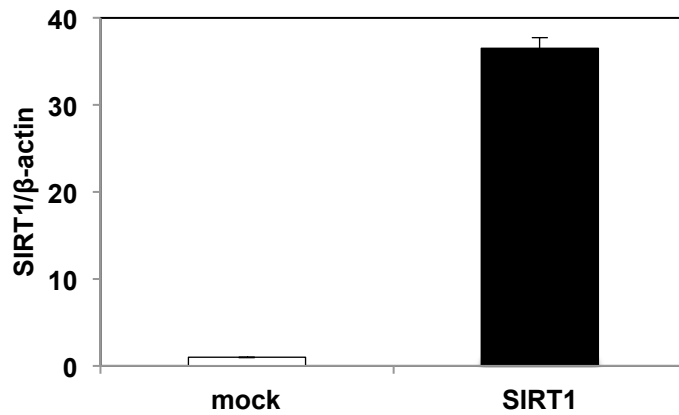

Fig. S3. SIRT1 expression level in recombinant HUC-F2 cells. The SIRT1 expression level in HUC-F2 cells transduced with SIRT1 or mock were assessed by qPCR in triplicate using primers specific for SIRT1 (5'-GCCTCACATGCAAGCTCTAGTGAC-3' and 5'-TTCGAGGATCTGTGCCAATCATAA-3') and for β -actin, and normalized to the corresponding β -actin level.
