Querying with SPARQL 1.1

The main UniProt website <http://www.uniprot.org> is document centric to serve users who search for entries of their interest to browse them. It has limited support for analytical queries. To fill this gap, the UniProt consortium provides <http://beta.sparql.uniprot.org> for answering analytical queries and gather statistics on the UniProt data using SPARQL 1.1, a standardized query language that is resource centric.

All queries below where run against UniProtKB release 2014_01.

Number of annotations that overlap with a disease variant

```
