

**Figure S1. Screening of non-essential E2 conjugases and E3 ligases for effects on 3HA-Acm1<sup>5A</sup> expression level.** 3HA-Acm1<sup>5A</sup> was expressed from the natural *ACM1* promoter on a centromeric plasmid in BY4741 (WT) and deletion strains lacking the genes indicated above each lane. The steady state level of 3HA-Acm1<sup>5A</sup> in asynchronous log phase cultures of each strain was compared to that of wild-type 3HA-Acm1 (labeled “Reference”) expressed from the same plasmid in BY4741 by immunoblotting with anti-HA antibody. G6PDH is a loading control.
