

Table S3. Physiological parameters

	lnMR	°C	S (‰)
<i>D. rerio</i>	31.178	18-24	0-25
<i>O. latipes</i>	31.587	18-24	0-35
<i>G. aculeatus</i>	31.937	4-20	0-35
<i>T. rubripes</i>	32.033	15-20	14-35
<i>T. nigroviridis</i>	31.637	24-28	0-35

MR = metabolic rate temperature-corrected by the Boltzmann's factor

°C and S = environmental ranges of temperature and salinity
