

Table S2

	Total Images	Classified Images	a	b
C175S (1-hour)	1906	1424	39%	55%
Size (Å)			650	656
Resolution (FSC=0.5)(Å)			37	33
Resolution (FSC=0.3) (Å)			34	29

Table S2

Table S2 describes the statistics for the C175S mutant, which cannot form stabilizing disulfide crosslinks. (a) started with a mature model (Table S1 column a or Figure 3 panel a). (b) started with the least mature model (Table S1 column e or Figure 3 panel e). The percentages refer to the fraction of classified capsid images used for the reconstruction.
