

**Supplementary Figure S3.** The *ycf1* mVISTA similarity plot of Borung, Paraggio, R108 and angiosperm species *Cicer arietinum* (NC\_011163), *Lotus japonicus* (NC\_002694), *Nicotiana tabacum* (NC\_001879), *Solanum lycopersicum* (NC\_007898), *Spinacea oleracea* (NC\_002282) and *Arabidopsis thaliana* (NC\_000932) compared to the *M. truncatula* 2HA line. The window is 100 bp, the consensus width is 100 bp and the consensus identity is 70%.
