COLOUR FIGURES IN NATURE NANOTECHNOLOGY										
Nature Nanotechnology is committed to providing authors with the highest quality figures, and we use the latest techniques to achieve this reproduction. We recognise, however, that excessive colour figure and page charges can sometimes place an enormous burden on authors. We therefore charge authors a fee of \$540 for the first colour figure and \$270 per figure for additional colour figures; this covers part, but not all, of our additional costs for four-colour reproduction. (Please note that in EU countries VAT will be added if you are unable to provide us with your VAT details below).										
No author will be denied publication based on his/her inability to meet these charges. If we agree that colour is essential but you are unable to meet the costs, they will be waived if you explain the circumstances before your paper is published. Otherwise you will be billed after publication.										
PLEASE COMPLETE AND SIGN THE SECTION BELOW, DELETING WHICHEVER ALTERNATIVE DOES NOT APPLY, AND RETURN A COPY OF THIS SHEET TO NATURE NANOTECHNOLOGY (Fax +44 207 843 4563)										
I agree to pay the sum requested by <i>Nature Nanotechnology</i> in the event that colour is considered essential.										
☐ I am unable to meet the costs of colour for the following reason:										
☐ I am a VAT registered paying member of the EU
