1) Example video clips[†]

Supplementary Video 1: Shaping trial towards end of the shaping phase

Supplementary Video 2: Test trial, on-off condition, correct choice

Supplementary Video 3: Test trial, contact condition, incorrect choice

Supplementary Video 4: Test trial, perceptual containment condition - switch after incorrect

first touch (considered as incorrect choice)

[†] may not play in Windows Media Player, use VLC player instead.

2) Dataset of proportion of correct choices, side bias and occurrence of switching for each session of the acquisition phase (on-off condition) and for the four conditions presented during intermixed trials.
