

Supplementary figure 8. Doxycycline-inducible CTSB expression in immortalized PyMT cells (iPyMT). *a*, quantitative RT-PCR analysis of hCTSB mRNA relative to Actin upon induction with doxycycline (1 μ M). *b*, quantitative RT-PCR analysis of hCTSB mRNA relative to β -actin after removal of doxycycline. *c*, protein expression of hCTSB detected by western blot upon addition of doxycycline. *d*, protein expression of hCTSB detected by western blot after removal of doxycycline.
