

## Supplement 2

---

**Algorithm 2:** computeRecommendations

---

**Input :**

,

number of maximum recommendations per part  $k$

**Output :**  $r^l$

1 **foreach**  $r_i \in r^l$  **do**

2   | **if**  $r_i == \emptyset$  **then**

3   |   |  $topK \leftarrow \text{get\_TopK}(c_i, S0^l, k)$ ; // determines top  $k$  matches for  $c_i$  by  $\text{sim}$  ( $MaxN$  selection)

4   |   |  $r_i \leftarrow topK$ ;

5 **end**

6 **return**  $r^l$ ;
