

RFX1-dependent activation of SHP-1 induces autophagy by a novel obatoclax derivative in Hepatocellular carcinoma cells

Supplementary Material

Supplementary figure 1: SC-2001 induced apoptosis of PLC5 cells. PLC5 cells were exposed to different concentration of SC-2001 for 48 h. After that, TUNEL assay were subjected to analyze the apoptotic effect of SC-2001.

Supplementary figure 2: The model of SC-2001-induced autophagic cell death.
