

**Disk position sagittal (closed mouth)**

R	L
	No evaluation possible
	Regular
	Partial anterior disk displacement
	Complete anterior disk displacement
	Posterior disk displacement
	Localizer image in the sagittal plane
	Localizer image perp. to condylar long axis
	Localizer image insufficiently aligned
	Condyle not discernible in localizer image

**Disk position sagittal (open mouth)**

R	L
	No evaluation possible
	Regular
	Anterior disk displacement
	Posterior disk displacement
	Disk reduction: Yes
	Disk reduction: No
	Disk adhesion
	Localizer image in the sagittal plane
	Localizer image perp. to condylar long axis
	Localizer image insufficiently aligned
	Condyle not discernible in localizer image

**Disk position coronal (closed mouth)**

R	L
	No evaluation possible
	Regular
	Lateral displacement
	Medial displacement
	Anterior displacement
	Localizer image parallel to condylar long axis
	Localizer image insufficiently aligned
	Condyle not discernible in localizer image

**Disk displacement right**

	Anterior	Posterior	Regular
Regular			-----
Lateral			
Medial			

**Disk displacement left**

	Anterior	Posterior	Regular
Regular			-----
Lateral			
Medial			

**Bilaminar zone (sagittal/open mouth)**

R	L
	No evaluation possible
	Disco-temporal ligament visible
	Disco-temporal ligament not visible
	Disco-condylar ligament visible
	Disco-condylar ligament not visible

**Signal intensity, TSE T2-weighted (condyle)**

R	L
	No increased signal intensity
	Increased signal intensity

**Signal intensity, TSE T2-weighted (joint space/bilaminar zone)**

R	L
	No increased signal intensity
	Increased signal intensity

**MRI with contrast media, joint/soft tissue/bone:**

**Signature:**
