

Supplementary Fig. 1. Ulcer counts. Colon ulcer counters were performed on day 4 of DSS treatment. c, control. d, DSS treated. W, wild-type mice. T, T-bet Tg mice. G, GATA-3 Tg mice. R, ROR γ t Tg mice. Data represent means \pm SEM (* P <0.01; ** P <0.05) (n=3, each group).

Supplementary Fig. 2. MPO-positive cells in the colon. MPO-positive cells were counted on day 4 of DSS treatment. c, control. d, DSS treated. W, wild-type mice. T, T-bet Tg mice. G, GATA-3 Tg mice. R, ROR γ t Tg mice. Data represent means \pm SEM (* P <0.01; ** P <0.01, DSS treated vs. control) (n=3, each group).

Supplementary Fig. 3. F4/80-positive cells in the colon. F4/80-positive cells were counted on day 4 of DSS treatment. c, control. d, DSS treated. W, wild-type mice. T, T-bet Tg mice. G, GATA-3 Tg mice. R, ROR γ t Tg mice. Data represent means \pm SEM (* $P < 0.01$; ** $P < 0.01$, DSS treated vs. control) (n=3, each group).
