

Hollenbaugh et al., dNTP Pool Modulation Dynamics by SAMHD1 Protein in Monocyte-derived Macrophages

Additional file 1

Additional file 1: Dual Vpx+ VLP Kinetic Analysis. (A) Diagram showing the treatment regime for single and dual VLP treatments and the days harvested after treatment. (B-E) The HIV-1 RT-based dNTP assay was performed on samples to determine concentrations of the four different metabolites. Two-way-ANOVA was applied to determine significant differences within each group indicated (*, $P < 0.05$; **, $P < 0.01$ and ***, $P < 0.001$). Analysis was done for two independent MDM donors.
