

Supplemental Figure 1. Quantile-quantile plot of genome-wide association results for the anti-gliadin antibody trait: A, including the extended HLA region [genomic inflation factor (Devlin and Roeder 1999) $\lambda = 1.008$]; and B, excluding the extended HLA region ($\lambda = 1.001$). Devlin B, Roeder K. 1999. Genomic control for association studies. *Biometrics* 55:997-1004.
