

Supplementary Data

SUPPLEMENTARY FIG. S1. Adventitia-derived progenitor cell (APC) biomarkers of resiliency to oxidative stress. (A) Bar graphs showing the amount of protein carbonyl groups, after exposure of cells to different concentrations of H_2O_2 (50 and 250 μM) for 24 h. (B, C) Bar graphs and representative images of phospho- γH2AX staining. Data are expressed as mean \pm SEM of triplicates. * $p < 0.05$ versus control. # $p < 0.05$; ## $p < 0.01$ versus human umbilical vein endothelial cell (HUVECs). Scale bar 50 μm .
