

Supplementary information, Figure S2 Generation of V5-tagged Baf250a floxed allele. **(A)** Targeting strategy to generate V5-tagged *Baf250a* floxed allele. **(B)** Targeted ES cells were identified by Southern blot using 5' and 3' probes. **(C)** The expression of Baf250a-V5 fusion protein and specificity of V5 tag were examined by double-label fluorescent immunohistochemistry. scale bar = 50 μ m.
