

Supplementary Data

SUPPLEMENTARY FIG. S1. Successful polarization of *in vitro*-derived Th cell subsets. Transcription factors (Tbet, Gata3, Ror γ t, and FoxP3) and cytokines (IFN- γ , IL-4, and IL-17) were measured by quantitative real-time polymerase chain reaction in the cells corresponding to the experiments shown in Fig. 3A. Shown are the means of 6 independent experiments, indicating that the correct polarization was achieved. Th, T helper.
