

A**B**

Figure S20. Analyses of PAS sequences of Fip1 APA targets. (A) Average nucleotide composition of the proximal and distal PASs in Fip1 APA targets. The fraction of each nucleotide (y axis) is plotted from -100 to +100nt relative to the cleavage site (x axis). (B) Average sequence conservation (PhyloP score) of the proximal and distal PASs in Fip1 APA targets within the same region.
