

Figure S11 GFP-NIME^{CYCLINB} expression is not altered in *snxA1* or $\Delta snxA$ strains. Total protein extracts from strains harboring GFP-NIME^{CYCLINB} together with *snxA*⁺ (wt), *snxA1*, or $\Delta snxA$ were run on SDS-PAGE, blotted to nitrocellulose, and the blot probed with anti-GFP antibody/HRP secondary antibody. The blot was stripped and re-probed with anti α -tubulin antibody/HRP secondary antibody. Strains used were the same strains as in Figure 11.
