

Adjusted HR of cardiovascular diseases after multiple imputation of AKI stages in patients without measured plasma creatinine from ICU admission to hospital discharge^a

	AKI stage 1	AKI stages 2–3
	Adjusted HR (95% CI)	Adjusted HR (95% CI)
Heart failure	1.31 (1.00–1.64)	1.44 (1.13–1.82)
MI	1.08 (0.74–1.57)	1.56 (1.08–2.24)
Stroke	1.12 (0.71–1.68)	1.09 (0.71–1.68)

^a Compared with patients without AKI.

AKI, acute kidney injury; CI, confidence interval; HR, hazard ratio; ICU, intensive care unit; MI, myocardial infarction.
