

Figure U4

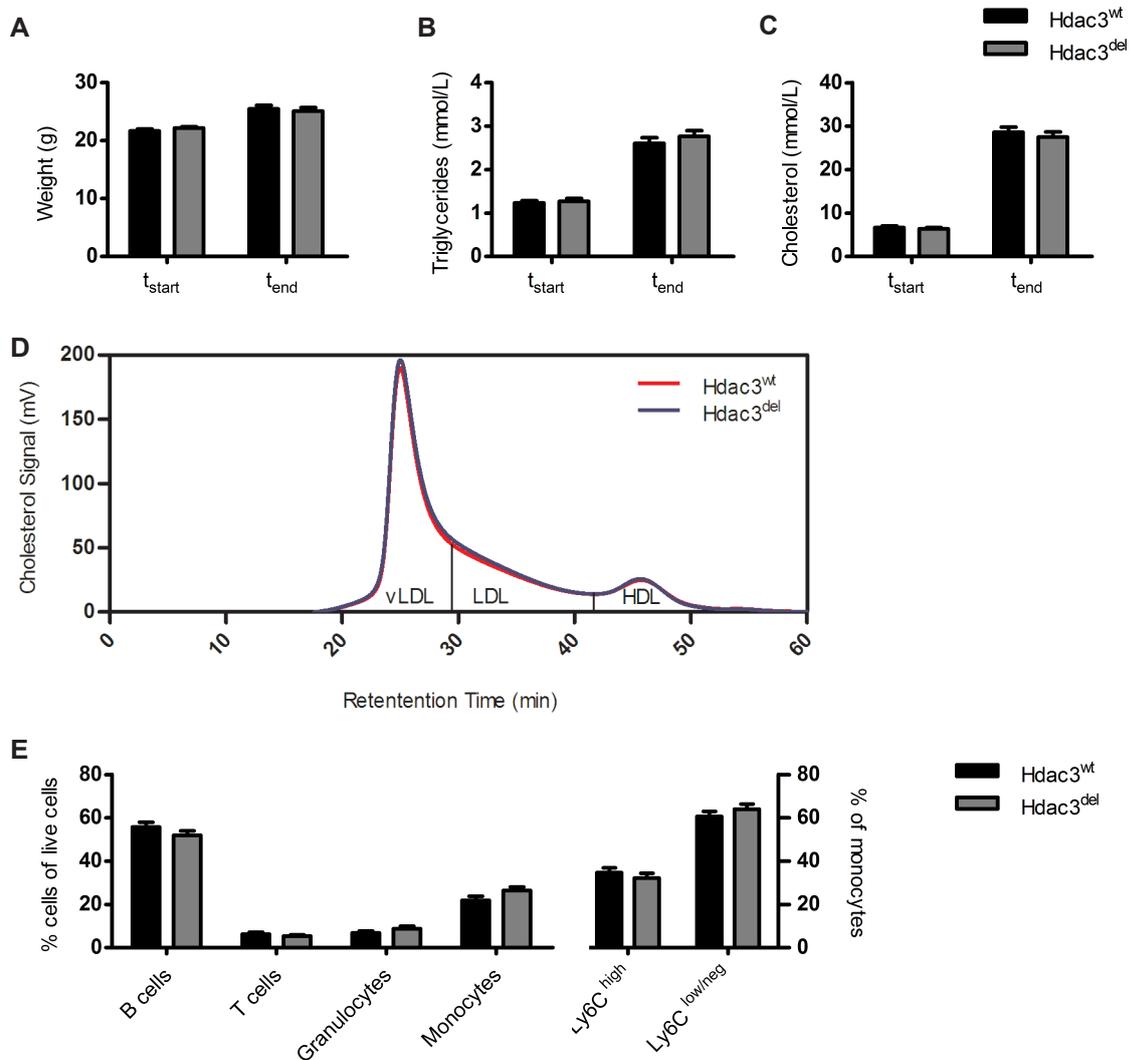

Figure U4. Weight, lipid levels and immune cell counts are similar in transplanted LDLR^{-/-} mice.

- A. Weight was measured before the start of the HCD and when the mice were sacrificed.
- B. Triglycerides levels were determined in the plasma.
- C. Cholesterol levels were determined in the plasma.
- D. Cholesterol subfractions were determined in the plasma.
- E. Leukocyte proportions in the blood were evaluated when the mice were sacrificed.
