

Triticum urartu

- Turkey
- Lebanon
- USSR/Armenia

PCoordA

(Principal Coordinates Analysis)

158 individuals

248 polymorphic AFLP markers

genetic distance: Jaccard

1. axis: 22,8%

2. axis: 10,5%

3. axis: 5,9%

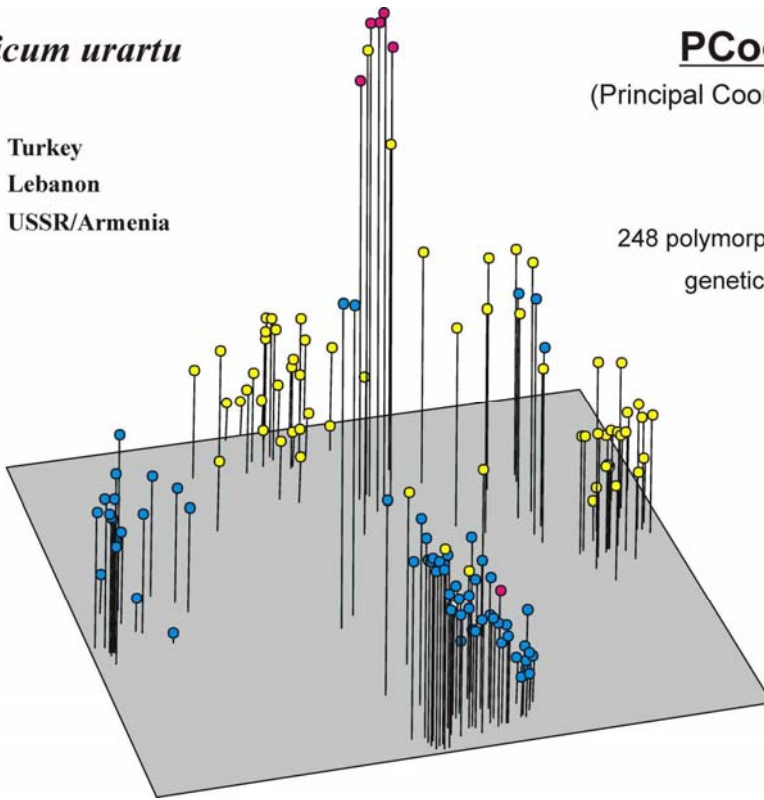

Figure S2 Principal Coordinates Analysis of the *T. urartu* wheat accessions. In this analysis, the lines molecularly intermediate between *T. urartu* and *T. monococcum* have not been considered.
