

Supplementary Data

SUPPLEMENTARY FIG. S1. Concentrations of cytokines and growth factors by ELISA in both MV preparations. Results are expressed as pg/mL. **(A)** Measurement of TGF β and Galectin-1. **(B)** Measurement of HGF and PGE2. The remaining bioactive factors (IL-2, IL-6, IL-10, GM-CSF, and IFN γ) were below the detection threshold. HGF, hepatocyte growth factor; PGE2, prostaglandin E2.
