

SUPPLEMENTARY FIG. S6. Administration of JC1-40 attenuates inflammatory responses in the MCD diet-induced NASH. Eight-week-old C57BL/6N mice were fed with either MCS or MCD diet for 4 weeks. After 1 week of diet feeding, JC1-40 was administered daily at doses of 5 and 10 mg/kg/day by oral gavage for 3 weeks. Liver sections were stained with anti-TNF α or anti-IL-1 β antibodies. Magnification of $\times 200$. IL, interleukin; NASH, nonalcoholic steatohepatitis; TNF α , tumor necrosis factor α .
