

SUPPLEMENTARY FIG. S3. CD27 expression on lymphocytes. (A) Spleen samples from *BQ.Ncf1^{m1J}* ($n=5$), *BQ* ($n=5$), CGD patients ($n=7$), x-linked carriers ($n=4$), and healthy controls ($n=13$) were analyzed by flow cytometry for the relative frequency of CD27⁺ cells within their splenic CD19⁺ B lymphocytes and (B) CD3⁺T lymphocyte compartments. Bars represent average frequencies, error bars denote standard error of means, two-tailed Mann-Whitney *U* test, * $p < 0.05$.
