		Descriptor	v	Reported Pg#
		Title and Abstract		-
Title and Abstract	1	Information on how Unit were allocated to intervention	V	2 - Abstract
	1	Structured abstract recommended	V	2 - Abstract
		Information on target population or study sample	V	2 - Abstract
		Introduction		
D. J	2	Scientific background and explanation of rationale	V V	3 - Introduction
Background	2	Theories used in designing behavioral intervention  Methods	V	4 - Introduction
Particpants  Intervention	3	Eligibility criteria for participants, including criteria at different levels in recruitment/sampling plan (e.g., cities, clinics, subjects)	v	5 - Participants
			·	
	ii	Method of recruitment (e.g., referral, self-selection), including the sampling method if a systematic sampling plan was implemented	V	5 - Participants
	1	Recruitment setting	V	5 - Participants
		Settings and locations where the data were collected	V	5 - Participants
	i	* Details of the interventions intended for each study condition and how and when they were actually administered, specifically including		
	1	Content: what was given?	v	7 - Study design
	1	Delivery method: how was the content given?	v	7 - Study design
	1	Unit of delivery: how were the subjects grouped during delivery?	v	7 - Study design
	1	Deliverer: who delivered the invertion?	V	7 - Study design
	1	Exposure quantity and duration: how many session or epidoses or event were intended to be delivered? How long were they intended to last?		
	ii	Time span: how long was it intended to take to deliver the intervention to each unit?	V	7 - Study design
	i	Time spain now long was a metaded to deliver the med vention to each diffe:	v	7 - Study design
	4	Activities to increase compliance or adherence (e.g., incentives)	V	7 - Study design
Objectives	5	Specific objectives and hypotheses	V	4 - Introduction
· ·	1	Clearly defined primary and secondary outcome measures	V	7 - Study design
	1	Methods used to collect data and any methods used to enhance the quality of measurements	V	7 to 11 - Study design to outcome measur
Outcomes	6	Information on validated instruments such as psychometric and biometric properties	V	7 to 11 - Study design to outcome measur
Sample Size	7	How sample size was determined and, when applicable, explanation of any interim analyses and stopping rules'	V	12 - Sample
	1	Unit of assignment (the unit being assigned to study condition, e.g., individual, group, community)	V	5 - Participants
	1	Method used to assign units to study conditions, including details of any restriction (e.g., blocking, stratification, minimization)	V	5 - Participants
Assignement Method	8	Inclusion of aspects employed to help minimize potential bias induced due to non-randomization (e.g., matching)	V	5 - Participants
	in .	Whether or not participants, those administering the interventions, and those assessing the outcomes were blinded to study condition assignment; if so,		
Blinding (masking)	9	statement regarding how the blinding was accomplished and how it was assessed.	V	6 - Study design
		Description of the smallest unit that is being analyzed to assess intervention effects (e.g., individual, group, or community)	V	6 - Study design
	1	If the unit of analysis differs from the unit of assignment, the analytical method used to account for this (e.g., adjusting the standard error estimates by the		
Unit of analysis	10	design effect or using multilevel analysis)	v	=
,		Statistical methods used to compare study groups for primary methods outcome(s), including complex methods of correlated data	V	13 - Statistical Analysis
	1	Statistical methods used for additional analyses, such as a subgroup analyses and adjusted analysis	V	13 - Statistical Analysis
	1	Methods for imputing missing data, if used	V	13 - Statistical Analysis
Statistical Methods	11	Statistical software or programs used'	V	13 - Statistical Analysis
		Results		
		*Flow of participants through each stage of the study: enrollment, assignment, allocation, and intervention exposure, follow-up, analysis (a diagram is strongly		
	in .	recommended)	V	13 - Results
	in .	Enrollment: the numbers of participants screened for eligibility, found to be eligible or not eligible, declined to be enrolled, and enrolled in the study		
	in .		V	13 - Results
	in .	Assignment: the numbers of participants assigned to a study condition	V	13 - Results
	in .	Allocation and intervention exposure: the number of participants assigned to each study condition and the number of participants who received each		
	i	intervention		
		P.B. and the first transfer of the state of	V	13 - Results
	J	Follow-up: the number of participants who completed the follow-up or did not complete the follow-up (i.e., lost to follow-up), by study condition	v	
			v	13 - Results
Participant flow	12	Analysis: the number of participants included in or excluded from the main analysis, by study condition		
Participant flow	12	Analysis: the number of participants included in or excluded from the main analysis, by study condition  Description of protocol deviations from study as planned, along with reasons	V V V	13 - Results 13 - Results 13 - Results
Participant flow	12	Analysis: the number of participants included in or excluded from the main analysis, by study condition  Description of protocol deviations from study as planned, along with reasons  Dates defining the periods of recruitment and follow-up	V V V	13 - Results 13 - Results 13 - Results 5 - Participants
Participant flow	12	Analysis: the number of participants included in or excluded from the main analysis, by study condition  Description of protocol deviations from study as planned, along with reasons  Dates defining the periods of recruitment and follow-up  Baseline demographic and clinical characteristics of participants in each study condition	V V V V	13 - Results 13 - Results 13 - Results 5 - Participants 5 - Participants
Participant flow	12	Analysis: the number of participants included in or excluded from the main analysis, by study condition  Description of protocol deviations from study as planned, along with reasons  Dates defining the periods of recruitment and follow-up  Baseline demographic and clinical characteristics of participants in each study condition  Baseline characteristics for each study condition relevant to specific disease prevention research	V V V	13 - Results 13 - Results 13 - Results 5 - Participants 5 - Participants 5 - Participants
Participant flow  Recruitment	12	Analysis: the number of participants included in or excluded from the main analysis, by study condition  Description of protocol deviations from study as planned, along with reasons  Dates defining the periods of recruitment and follow-up  Baseline demographic and clinical characteristics of participants in each study condition  Baseline characteristics for each study condition relevant to specific disease prevention research  Baseline comparisons of those lost to follow-up and those retained, overall and by study condition	V V V V V	13 - Results 13 - Results 13 - Results 13 - Results 5 - Participants 5 - Participants 5 - Participants 5 - Participants
		Analysis: the number of participants included in or excluded from the main analysis, by study condition  Description of protocol deviations from study as planned, along with reasons  Dates defining the periods of recruitment and follow-up  Baseline demographic and clinical characteristics of participants in each study condition  Baseline characteristics for each study condition relevant to specific disease prevention research  Baseline comparisons of those lost to follow-up and those retained, overall and by study condition  Comparison between study population at baseline and target population of interest	V V V V V V V V V V V V V V V V V V V	13 - Results 13 - Results 13 - Results 13 - Results 5 - Participants
		Analysis: the number of participants included in or excluded from the main analysis, by study condition  Description of protocol deviations from study as planned, along with reasons  Dates defining the periods of recruitment and follow-up  Baseline demographic and elinical characteristics of participants in each study condition  Baseline characteristics for each study condition relevant to specific disease prevention research  Baseline comparisons of those lost to follow-up and those retained, overall and by study condition  Comparison between study population at baseline and target population of interest  Baseline demographic and clinical characteristics of participants in each study condition	V V V V V V V V V V V V V V V V V V V	13 - Results 13 - Results 13 - Results 13 - Results 5 - Participants 5 - Participants 5 - Participants 5 - Participants
		Analysis: the number of participants included in or excluded from the main analysis, by study condition  Description of protocol deviations from study as planned, along with reasons  Dates defining the periods of recruitment and follow-up  Baseline demographic and clinical characteristics of participants in each study condition  Baseline characteristics for each study condition relevant to specific disease prevention research  Baseline comparisons of those lost to follow-up and those retained, overall and by study condition  Comparison between study population at baseline and target population of interest  Baseline characteristics for each study condition relevant to specific disease prevention research  Baseline characteristics for each study condition relevant to specific disease prevention research	V V V V V V V V V V V V V V V V V V V	13 - Results 13 - Results 13 - Results 13 - Results 5 - Participants 25-30 - Tables and Figures 25-30 - Tables and Figures
