**Table T4 - List of predicted gene interactions in *S. cerevisiae* obtained from a transcription factor knockout dataset**

The table shows a sorted list of the 300 most confident edges obtained by applying PG<sup>new</sup> and LTR<sup>u,u</sup> to the dataset published by Reimand et al. in <http://www.ebi.ac.uk/arrayexpress/experiments/E-MTAB-109>. Each predicted edge is compared against the four silver standards SS<sub>1</sub>-SS<sub>4</sub> (see main text).

The values in the silver standard columns are:

- 1:** if the predicted edge is contained in the silver standard;
- 0:** if the predicted edge is not contained in the silver standard;
- x:** if the predicted edge contains a node not contained in the silver standard.

Ranking	Transcription factor	Target gene	SS <sub>1</sub>	SS <sub>2</sub>	SS <sub>3</sub>	SS <sub>4</sub>
