

## Additional File 8

### Additional file 8. Intracellular localization of $\beta$ -TrCP.

HeLa cells were treated or not with TNF $\alpha$  (10 ng/ml) for 15 min, then  $\beta$ -TrCP localization was investigated by immuno-fluorescence. GM130 was used as a marker for the Golgi Apparatus. Nuclei were stained with DAPI. Representative images are shown, with the boxed areas enlarged on the right.
